

## Mobile Vaccination Clinics Powered by EHR Technology

Calvert County Health Department Expands Mobile Health Access Through School-Based Clinics

### BACKGROUND

Public health departments often deliver care far beyond their office walls. School clinics, mobile vaccination events, and outreach programs require tools that allow staff to document care quickly while remaining focused on the people they serve.

For Calvert County Health Department, Patagonia Health's EHR, Practice Management, and Billing solution supports vaccination clinics conducted directly in local schools. These mobile clinics help ensure students receive important immunizations without needing to travel to a clinic.

### SUPPORTING SCHOOL-BASED VACCINATION PROGRAMS

Calvert County's vaccination clinics are coordinated closely with local schools. Information about upcoming clinics is shared through school nursing teams and distributed to parents so families can plan ahead. In the future, Calvert County plans to expand its approach by hosting regional clinics so students of all ages can participate.

These school-based events help increase access to preventive care while reducing barriers for families.

### REAL-TIME MOBILE CLINIC DOCUMENTATION

One of the most important requirements for mobile vaccination events is the ability to document care immediately while services are being delivered. With Patagonia Health, staff can record vaccinations *directly in the EHR*, which automatically updates the state vaccine registry.

*"Dispensing vaccinations in Patagonia Health is smooth, quick, and easy to use."* - Rosa, Ortiz, Disease Surveillance and Response, Calvert County MD

Real-time documentation allows clinicians to remain focused on patients while ensuring records are updated accurately.

In addition to documenting vaccinations, the team can also upload immunization information to the Maryland vaccine registry in real time.

*"We're able to document and upload vaccinations to the registry in real time while we're running the clinic."* Rosa, Ortiz, Disease Surveillance and Response, Calvert County MD

## BEYOND VACCINATION CLINICS

Introducing a new EHR into public health operations often requires adjustments along the way. The department emphasized the importance of working with a responsive partner who listens to feedback.

*“Patagonia Health has been very quick to respond and work through issues with us.”* - Rosa, Ortiz, Disease Surveillance and Response, Calvert County, MD

Staff noted that Patagonia Health’s support team has been accessible and willing to collaborate when questions arise.

*“I never felt like we were ignored or that our concerns weren’t heard.”* - Rebecca Boulos, Community Health Nurse, Calvert County, MD

## PUBLIC HEALTH OUTREACH

Patagonia Health’s EHR features allows Calvert county health department to meet communities where they are. By bringing care directly into schools, the Calvert County helps protect students while supporting broader community health.

With tools that enable real-time documentation and responsive support from the Patagonia Health team, staff can focus on what matters most: delivering preventive care to the people who need it.
