

MASS MEDICATION DISPENSING APP

Coordinated Distribution, Connected Records

Getting medications to a community quickly and accurately requires more than logistics. Mass Medication Dispensing is purpose-built for largescale distribution events, supporting everything from patient registration and household dispensing to documentation and reporting, all within the Patagonia Health EHR.

Because every step lives in one system, your team spends less time switching between tools and more time focused on serving the community.

Key Features

- Medication inventory, lot numbers, and expiration dates are tracked automatically
- Create an auditable chain of custody with built-in staff signature tools for dispensing records
- Configure walk-in events on the fly, with a system ready to deploy for same-day emergency response
- Streamline the billing process with the ability to collect insurance information during registration
