

MASS VACCINATION APP

From Registration to Record, Without the Runaround

Running a mass vaccination event means managing a crowd, collecting data accurately, keeping lines moving, and ensuring every record reflects what happened. The Mass Vaccination App handles the full event lifecycle in one place, with no third-party scheduling tools required.

With our latest update to the Mass Vaccination App, staff is now empowered to manage large-scale vaccination clinics from start to finish without needing support for custom setups.

Key Features

- Administer and document vaccines in one place, reducing time spent per patient
- Update patient records in real time, eliminating redundant data entry
- Access Vaccine Information Sheets (VIS) and education materials at the point of care
- Reduce no-shows with up to 3 automatic appointment reminders sent to patients
- Manage and deliver multiple consent forms directly within the EHR
