

Integrated Interactive TB Treatment Documentation

Patagonia Health EHR TB App is designed and developed for local health departments for clinical documentation of patients in TB treatment. The App has the complete workflow of a LTBI or Active TB treatment and allows the users to chart the following:

- ▲ Epidemiological assessment record
- ▲ Lab and x-ray orders and results
- ▲ Physician medication orders
- ▲ Sputum collection records
- ▲ Record of TB contacts
- ▲ Patient education
- ▲ Monthly medication dispensing records
- ▲ Directly observed medication therapy records
- ▲ Monitoring drug reactions
- ▲ Flow sheet to capture visit details

Key Benefits

- ✓ Entire TB treatment displays on one screen
- ✓ TB records interact seamlessly with other parts of the EHR
- ✓ Users can easily print the entire record or parts of it, or send electronically to other organizations

"When we were first asked if we wanted to work with Patagonia Health to develop a TB App, my response was, if a vendor gives you a chance to work on something, take it!"

-Diane Bauguess, BS RN, CD/TB/STD/Rabies Program Coordinator, Wilkes County Health Department
