

IMMUNIZATION APP

Integrated immunization functionalities

Patagonia Health's HIPAA-compliant Immunization App allows providers to dispense and administer vaccines, view patient histories, and access specific immunization reports. This functionality eliminates duplicate entries and assists in billing workflows.

Additional Features*

- ✓ Immunization Inventory App automatically keeps track of vaccine inventory. Track inventory by funding source (e.g. VFC, 317 or private) and clinic sites. Through barcode scanning, inventory fields auto-populate (NDC, Brand, Vaccine/CVX, Manufacturer)
- ✓ Barcode Scanning makes inventory input and dispensing easy; simply scan vaccine and save nurses time. Eliminate cumbersome task of reading small print on vaccines
- ✓ Interface to state Immunization Registry (bidirectionally, when available)

*These features can be added at an additional cost

Key Benefits

- Quick, easy entry of patient-provided historical immunization records (e.g., from other state registries, physicians, etc)
- Real-time printing of administered vaccines
- Web-based solution for use in health department, off-site, or remote clinic
- Easy-to-use screens cut down data entry time for nurses
- Auto calculation of the appropriate billing admin code
- Maintained and updated VIS (Vaccine Information Statement)
