

SINGLE SIGN ON

User Authentication Service

Remembering multiple sign-ons for a variety of tools, applications, and health registries can slow staff down. Single sign-on (SSO) is an identification method that enables users to log in to multiple applications and websites with one set of credentials. SSO streamlines the authentication process for users regardless of the domain, platform, or technology they are using.

An identity provider can be the host and activate SSO, or we can redirect your login as SSO. Patagonia Health achieves SSO functionality with Security Assertion Markup Language (SAML) 2.0.

Key Benefits

- Fewer passwords to remember
- No need to assign and manage passwords for your team
- Additional security
- Faster sign-on time
- Internal hosting or vendor hosting
